Ontime Parking Solutions

Ontime Parking Solutions has been Britain's foremost player in the traffic management industry for the last 18 years.

Formerly known as Arcade Traffic Management, Ontime Parking Solutions is a key part of the rapidly-expanding Ontime Group of companies that also includes: Ontime Automotive and Ontime Rescue & Recovery. The Ontime Group is, in turn, a subsidiary of the Bidvest Group which employs 82,000 staff worldwide – it has 4,000 staff and 1,700 vehicles in the UK alone.

Ontime Parking Solutions provides parking enforcement for an impressive list of local authorities, including: The Royal Borough of Kensington & Chelsea; the London Boroughs of Hammersmith & Fulham, Haringey, Lambeth, Sutton and Wandsworth; Brighton & Hove City Council and the Adur District Council. Many of these relationships are long established with some dating back to the implementation of the Road Traffic Act of 1991.

Ontime Parking Solutions employs in excess of 130 specially trained staff to operate its 24 hr payment centres; customer information facilities; pound security; clamping, declamping and removal operations and decant service.

Via its 30-plus fleet of specialist vehicles, the division carries out in excess of 42,000 clamping and removal actions per annum. The decant facilities operate 24 hrs a day and can store up to 1,000 vehicles. Bespoke computer software, operated by a highly-experienced support team, helps to ensure the efficient movement and storage of these vehicles.

The core fleet can deal with all regular enforcement requirements but, when needed, any of the Ontime Group's unrivalled range of vehicles can be called upon to assist. This provides Ontime Parking Solutions with the unique and proven capability of removing anything from cars, coaches and trucks to the occasional helicopter and army tank!
